

MDHHS – MCIR Release Notes

Version 2023 – MCIR OLTP 2023 9.4.3.0 – RFC 217829

Release Date: April 26, 2023

Forecasting & Assessment Updates

- CVX 225 COVID-19 (Sanofi 5mcg/0.5ml) has been removed from the vaccine dropdown. Doses that have never been active are not reported. (Ref. #1896)

Updates

- On Outbreak and Employee Rosters, MCIR has been enhanced to consistently sort names without regard to upper/lower case letters. This is consistent across MCIR. (Ref. #730)
- When a user is no longer associated with a MCIR site, the Region 1 and 2 help desk phone numbers have been updated in the Authorization Error Message. (Ref. #2111 and #2306)
- An issue was resolved that produced an error when submitting a modification to the Site Information screen. Modifying Site Information now performs as expected. (Ref. #2319)
- **HL7 Updates:**
 - To support our increasing number of connections to other jurisdictions, MCIR HL7 ACK (**acknowledgement**) messages have been enhanced to provide more meaningful data particularly when expressing errors. This helps in troubleshooting and improving data quality. (Ref. #2237)
 - In the HL7 Viewer, the “Minor under 18” filter list will now only show messages for patients that are younger than 18 years old. Previously, if this filter had an invalid birthdate, it could not process and the page would not refresh. (Ref. #2213)
- An update was made to restrict directory permissions to address an audit finding. (Ref. #2320)

If you have questions or need assistance, please contact your Field Representative, MCIR Region, or MCIR SOM Help Desk at MDHHS-MCIRHelp@michigan.gov.
