

Reporting Compromised Doses in MCIR

- MCIR records vaccine doses that have been administered as being compromised.
- **This function is only available to local health departments and Michigan Department of Health and Human Services (MDHHS) level access in MCIR.**
- All Immunizing Providers should be informed to report any compromised doses to their local health department <https://www.michigan.gov/mdhhs/inside-mdhhs/county-offices/lhd> for recording on the MCIR record of the individual that has received a compromised dose. **Revised 11.15.2022**

1. Access the client’s record, then click on the **History** link, (Figure 1).

Compromised Vaccine Status Definitions

VALUE	DISPLAY NAME	DEFINITION
VACERR NV Non-valid Dose	Vaccine Admin Error	The vaccine was administered incorrectly, does not count towards protection as a valid dose and must be repeated. Examples: <ul style="list-style-type: none"> • Varicella dose given prior to one year of age. • Tdap given less than 7 years of age and dose 1,2 or 3 of series does not count.
VACERR V (valid dose)	vaccine admin error	The vaccine was administered incorrectly but <u>counts</u> toward protection (valid dose) and does not need to be repeated. Example: <ul style="list-style-type: none"> • DTaP given to 11 year old, to 2 year old, counts as valid dose.
VACEFF	vaccine efficacy concerns	The intended vaccine has expired or is otherwise believed to no longer be effective. Vaccine must be repeated. Example: <ul style="list-style-type: none"> • Expired or compromised due to inappropriate temperature exposure.
