MCIR USER REFERENCE GUIDE:

GLOSSARY OF MCIR ACRONYMS AND TERMINOLOGY

Acronym/Term	Definition	Resource
ACIP	Advisory Committee on Immunization Practices	ACIP
ACK (Messages)	Acknowledgement Messages: • AA Application Accept • AE Application Error • AR Application Reject	HL7 information at www.mcir.org
AFIX	Assessment, Feedback, Incentive and eXchange	AFIX
AH	All Hazards: A component of MCIR used to maintain and track Emergency Preparedness vaccines and antivirals.	
AIRA	American Immunization Registry Association is a membership organization that exists to promote the development and implementation of IIS as an important tool in preventing and controlling vaccine preventable disease.	AIRA
Admin	Administer, Administered, Administration(s)	
BMI	Body Mass Index	Communicable & Chronic Disease information
BP	Best Practices are non-policy driven principles serving to improve overall IIS data quality, accuracy, reporting and usage.	
CDC	Centers for Disease Control (see also NCIRD)	NCIRD
CVX	National-level vaccine codes used in the transmission of HL7 data (i.e. reporting of administered vaccines).	MCIR CVX table
DAR	Dose Administered Report is a MCIR report used to account for doses of administered vaccine by Vaccine Eligibility type.	
DOB	Date of Birth	
DQ	Data Quality	
DQA	Data Quality Assurance	
DQI	Data Quality Initiative	
Dedup	Deduplication refers to the process of reviewing and systematically eliminating: 1) duplicate Immunization Information System (IIS) person records, and/or 2) duplicate vaccine encounters within a person's IIS record.	
Demographics	Person specific information (e.g., full name, DOB, address, etc.)	
Dept.	Department	
EBC	Electronic Birth Record	
EHDI	Early Hearing, Detection and Intervention	EHDI

Acronym/Term	Definition	Resource
EHR	Electronic Health Record is an electronic version of a patient's medical history, including immunizations. (see also EMR)	
EIR	Ending Inventory Report is a MCIR report used to account for the movement of all vaccine lots in a specific balance period (i.e., during the selected balance cycle).	
EMR	Electronic Medical Record is an electronic version of a patient's medical history, including immunizations. (see also EHR)	
EPSDT	Early Periodic Screening Diagnosis and Treatment	EPSDT
ESSR	Electronic Submission Summary Report is a MCIR report detailing HL7 immunization transactions and related inventory effects.	
End User	End User is the individual utilizing a fully-functioning product (i.e., the IIS).	
GUI	General User Interface refers to the computer system or user application (see also UI).	
HEDIS	Health Employer Data and Information Set	HEDIS
HIE	Health Information Exchange is the electronic transmission of health records and data sets between healthcare-related organizations, in accordance with national standards.	
HL7	Health Level-7 is a set of international standards for the transfer of clinical and administrative data between software applications used by various healthcare providers.	HL7 information at www.mcir.org
ID	Identification refers to various health information identification numbers which may be retained within the IIS. Examples: IIS Site ID or IIS, EHR/EMR or MDHHS program ID assigned to a person.	
IIS	Immunization Information System	About IIS
INE	Immunization Nurse Educators from both the Michigan Department of Health and Human Services (MDHHS) and local health departments (LHDs) provide free immunization education to provider office staff throughout the state.	
IVEN	Influenza Vaccine Exchange Network	IVEN
Imm, Imms, Immz	Immunization(s)	
Inv	Inventory refers to the vaccines and/or antivirals on-hand at a site (facility).	
LHD	Local Health Department	
LTFU	Lost to Follow-Up	

Acronym/Term	Definition	Resource
LWB	Lost, Waste, Borrowed	
MCIR	Michigan Care Improvement Registry is Michigan's IIS	MCIR
MDHHS (formerly MDCH)	Michigan Department of Health and Human Services (formerly the Mich. Dept. of Community Health)	MDHHS
MOGE	Moved or Gone Elsewhere	
MPI	Master Patient Index is an electronic medical database that holds information on every patient registered. The database can be retained at the healthcare organization, regional or state level.	
MPHI	Michigan Public Health Institute	MPHI
MVX	National-level vaccine manufacturer codes used in the transmission of HL7 data (i.e. reporting of administered vaccines).	MCIR MVX table
Migrant	A person or family member moving from place to place due to seasonal work.	
NBS	Newborn Screening	[NBS](NBS)
NCIRD (formerly CDC)	National Center for Immunizations and Respiratory Disease (formerly the Centers for Disease Control)	NCIRD
NDC	National Drug Code	FDA National Drug Code Directory
OBRD	Onboarding is the process of working with IIS IT to set up and test immunization data from an external data source to the IIS. Onboarding is required before a site is approved for HL7 data submission to the IIS.	HL7 information at www.mcir.org
Overdue	Overdue refers to a person's immunization status, based on the recommended vaccine schedules.	
P4M	Petition for Modification is a document used to request necessary changes to a person's IIS record.	
POC	Point of Contact refers to the person's Responsible Party.	
PROD	Production refers to the IIS database the end-user access.	
PROV	Provider refers to the physician or medical office utilizing the IIS.	
R/R	Reminder/Recall is an IIS function (method) used to effectively ensure persons receive timely vaccine administrations, based on the recommend vaccine schedules.	
SIRS	School Information Recordkeeping System is a component of the Michigan IIS which is used by schools and childcares to maintain	

Acronym/Term	Definition	Resource
	immunization records and assess for required vaccinations, based on state requirements for childcare/school attendance.	
Site	Site refers to a medical practice ("provider office"), school, childcare, HCO or other facility type with access rights to the IIS.	
UI	User Interface refers to the computer system or user application (see also GUI).	
UTD	Up-to-Date refers to a person's immunization status, based on the recommended vaccine schedules.	
VFC	Vaccines for Children Program	VFC
VIM	Vaccine Inventory Module is a component of the IIS used to track an immunizing healthcare office's vaccine inventory.	
VIS	Vaccine Information Statement	Michigan VIS information
VR	Vital Records	Office of Vital Records
Vacc, Vax	Vaccine(s)	
WIC	Women, Infants and Children, Special Supplemental Nutrition Program	WIC
