

HL7 Production Site Moves to NEW EHR Product

PROCESS TO FOLLOW WHEN A MCIR HL7 PRODUCTION STATUS SITE MOVES TO A NEW EHR PRODUCT

- MCIR production status does not change if the new EHR is a MCIR Approved Product.
- If the new EHR product is not recorded on the [MCIR Approved Vendor List](#), then the site will need to be moved back to Onboarding Status until the EHR is approved by MCIR.
- New EHR should never submit TEST messages during the transition with a Production Status site.
- Site staff are responsible to ensure all vaccines are entered correctly in MCIR during the changeover period.
- Site needs to report to MDHHS-MU-MCIRHelp@michigan.gov
 - Name of new EHR product
 - Transition date
- The MCIR or Regional MCIR staff will act only when the site or vendor reports an issue.
