

Invalid Doses Report

How To: Generate and Retrieve Report in MCIR

This report generates a list of patient names, their date of birth, a vaccine antigen, the date that vaccine was previously administered, the reason the dose is considered invalid, and the current vaccine series status. Patients on this report received their last vaccine at your site/practice.

The patient must receive another dose of vaccine to become up-to-date and/or complete regarding that particular vaccine series even though another site/practice may have administered the invalid dose.

The input parameters of age cohort and vaccine dose number must be entered by the MCIR user. The data results are assessed by MCIR on the date the report generates.

Generate Invalid Doses Report

1. Start at the MCIR Home Screen.
2. In the **Reports** section box select Quality Improvement, (Figure 1).
3. The **Quality Improvement Reporting** screen will display, (Figure 2).
4. Select the Invalid Doses Report.
5. The Quality Improvement Reporting screen allows the option to name your report in the **Name** field, (Figure 2).
6. Select Manual for Type.
7. Select Months or Years for the Age Unit.
8. Enter the 'people of age at least, but not yet of age cohort you wish to assess.
9. Enter the vaccine dose number(s) by replacing the '0' in applicable fields regarding vaccines to be assessed. Enter '999' only when a complete series result is desired.
10. Select **Submit**.
11. You will be automatically directed to the MCIR Home Screen.

Patient Status: Active

Exclude Invalid Doses from Complete/Up-To-Date Series: Yes

List People Not Meeting Criteria: No

Display People As: List 1 Page - Official State of Mich Imms Record without address

Figure 2

Retrieve Invalid Doses Report

1. Start at the MCIR Home Screen.
2. In the **Reports** section box select Retrieve Results.
3. The **Provider Site's Scheduled Results** report screen will display with your report, (Figure 3).
4. The report is immediately ready to open when it displays 'Report Ready'.
5. Select Report to open to view, (Figure 3).
6. All reports will display as 'Report has been retrieved' if a MCIR user has opened and viewed the report.

Figure 3

The PDF **Invalid Doses Report** will display in a PDF pop up window on your screen, (Figure 4).

View the report in the PDF window or download the report.

The patient first and last name will appear as it is in the MCIR on all generated reports.

Report Generated: 06/16/2020		Invalid Doses Quality Improvement Report		Page: 1 of 1	
##### Sample Pediatrics		DTaP/DT/Td/Tdap	3	PCV	0
Age Cohort Selected: <u>at least 1 years and not yet 2 years old</u>		IPV	3	HPV	0
All Patients included are on Provider Id and		MMR	1	HepA	1
Patient Provider Status is Active		HIB	3	MenACWY	0
		HepB	3	MenB	0
		Varicella	1	Influenza	0
Total # of Active Patients on Provider Id: <u>795</u>		"999" assesses for vaccine series is Complete.			
Quality Improvement Activity Suggestion: Verify vaccine information in the patient medical chart prior to contacting any patients on this list. If all vaccine information is correct, patients should be contacted & schedule a visit to bring vaccines current. Patients on this list are "Active" in MCIR for this provider site, if they are no longer patients at this provider site, the Patient Provider Status should be changed to "Inactive - moved or gone elsewhere" using the current guidance from MDHHS Immunization program.					
Total # of patients with an invalid dose and the vaccine series is not complete: 5					
Patient Name	BirthDate	Antigen	Date Given	Reason Not Valid	Series
Sample Patient	01/19/2019	MMR1	10/22/2019	Does not meet minimum age	Overdue
Sample Patient	11/10/2018	MMR1	05/15/2019	Does not meet minimum age	Overdue
Sample Patient	02/17/2019	MMR1	08/19/2019	Does not meet minimum age	Overdue
Sample Patient	10/22/2018	HepB3	02/22/2019	Does not meet minimum age	Overdue
